Dec 7, 2011

Mississippi State Department of Health

Division of Genetics Services

Counties are grouped by the District Designations in the County Reference table. District designations within the Cases are not used.

The wide disparity of reporting by the various hospitals skews the data dramatically to the areas with the most hospitals transmitting data. As of December 2001, any user of this data should not interpret any missing data to indicate that there are no birth defects in that area.
