Re: Intergraph Express Products List 3707-E: Instructions for Use

1. Introduction

- 1.1 ITS currently has in place an Express Products List (EPL) to be used in the acquisition of Intergraph products and services. ITS EPLs meet Mississippi requirement for legal purchases. The Intergraph EPL 3707-E was created based on the Master Software License and Services Agreement between Intergraph and ITS on behalf of Mississippi governmental and educational entities effective June 4, 2007.
- 1.2 *EPL Effective Dates*
The Intergraph EPL 3707-E has a one year term, being valid from publication date until January 31, 2014.
- 1.3 *Who May Use*
The products and services on the attached EPL price sheet may be acquired by Mississippi agencies, universities, community/junior colleges, and governing authorities (cities, counties, school districts, etc.)
- 1.4 *Dollar Limitations of Use*
 - 1.4.1 The purchase limit is \$250,000 per project for the use of the Intergraph EPL without additional approval from ITS.
 - 1.4.2 Projects costing in excess of \$250,000 are beyond the scope of this delegated process and subject to full ITS review and authorization. Authorization to exceed the EPL dollar limitation is described in the ITS Procurement Handbook under the *EPL Planned Purchase* process, article 013-080. Below is the link to Procurement Handbook.

1.5 This list is governed under *Procurement Instruments: Express Products Lists (EPLs)* in the ITS Procurement Handbook. The EPL is not to be confused with state contracts issued by Department of Finance and Administration, Office of Purchasing and Travel (DFA-OPT).

2. **The Mississippi Coordinating Council for Remote Sensing and Geographic Information Systems**

The Mississippi Coordinating Council for Remote Sensing and Geographic Information Systems was created out of House Bill 861 during the 2003 regular session of the Mississippi Legislature. The council's responsibilities included assisting ITS in establishing policies and standards in the review and approval of procurements of both hardware and software related to remote sensing and geographic information systems (GIS.) On September 2, 2004, the council approved the establishment of EPLs for certain GIS software based upon standards recommended by the council's Technical User Group Standards Sub-Committee. The Intergraph EPL was one of several GIS Software EPLs recommended by this sub-committee.

3. **Product and Pricing Information**

3.1 The Intergraph price list is attached. Information used to publish this list was provided by Intergraph

3.2 EPL prices are not-to-exceed proposals that may be lowered, but not raised. The price list already incorporates a quantity discount based upon Mississippi volume. Very large quantities or special promotion offers may be available in some instances.

3.3 Shipping costs are included as part of the product purchase price.

3.4 Should the required purchase need a specialized configuration with products not listed on the EPL or should the purchase exceed the dollar limitation of \$250,000, the customer will come through ITS using our General Request for Proposal procedures for additional authorization.
