National Cyber Security Awareness Month (NCSAM)

Held every October, National Cybersecurity Awareness Month (NCSAM) is a collaborative effort between government and industry to raise awareness about the importance of cybersecurity and to ensure that all Americans have the resources they need to be safer and more secure online.

NCSAM 2019 will emphasize personal accountability and stress the importance of taking proactive steps to enhance cybersecurity at home and in the workplace. This year's overarching message – Own IT. Secure IT. Protect IT. – will focus on key areas including citizen privacy, consumer devices, and e-commerce security.
