## REPORTS

### Inventory Report/Usage Reports:

This report currently on produces a list of all items for a selected region with current pricing. We are asking that the Inventory Report and the Usage Report be combined and this option provided to school districts as well as OCN staff. A school district could then run an inventory report for all items that it has purchased for a selected period of time, could run a report for an individual item for a selected period of time, could run a report for usage for an individual school for any and all items, etc.

We would like all users to have the capability to run reports in Crystal Reports and export them in MicroSoft Office (word or excel).
