

MS AI Innovation Hub Showcase to Highlight Student Developed AI Proof of Concept Solutions for Mississippi State Government

JACKSON, MISS – May 5, 2026

The Mississippi AI Innovation Hub will host the MS AI Innovation Hub Showcase on May 5, 2026, from 11:00 AM to 3:00 PM at the Mississippi Sports Hall of Fame, bringing together student teams, state agency partners, and industry stakeholders to highlight innovative artificial intelligence proof of concept solutions developed to address real public sector challenges.

The showcase will feature student team demonstrations where attendees can explore projects created through the Innovation Hub in collaboration with Mississippi state agencies. Each team will present their solution, discuss the agency problem it was designed to address, along with the technical approach and potential public impact.

This event is designed to provide agencies and partners with a direct view into how student innovation teams are applying artificial intelligence to improve government services, streamline operations, and explore new approaches to public sector problem solving.

The showcase projects represent the mission of the Mississippi AI Innovation Hub by uniting students, government, and industry to explore and demonstrate meaningful, responsible, and innovative AI solutions for Mississippi.

The MS AI Innovation Hub Showcase represents an opportunity to celebrate student achievement, strengthen relationships between agencies and innovation partners, and encourage continued collaboration around AI use cases for the state.
