

### Mississippi Al Acceptable Use Policy & State Al Initiatives

Mississippi Department of Information Technology Services (ITS)

Briefing for Agency CIOs and Technical Staff
December 2025

### Mississippi's First Steps into Al

Governor Reeves issued Executive Order 1584 in Jan 2025: Mississippi's first Al-focused executive order.

Mandated ITS to lead AI strategy, inventory, and policy development while focusing on responsible AI adoption across state government.

Briefing covers: ITS Acceptable Use Policy, Al Principles, and Training Rollout.

Extra: Al Inventory Insights

### Al Acceptable Use Policy (AUP)

- 84% of agencies lack formal AI policies or procedures.
- Ensures responsible use that promotes security, privacy, and transparency.
- Al is to enhance, not replace, human judgment and responsibility.

CORE PRINCIPLES

Safety & Security

**Employee Oversight &** 

Decision-Making

Innovation

Accountability

Auditability

**Fairness** 

Accuracy, Validity, and Reliability

> Ethical, & Transparent Use

Responsible,

**Accessibility** 

Privacy & Data
Protection

### Agency Approval is Required:

- Al systems classified as high-risk, including those that could impact:
  - Safety, health, financial status, legal rights
  - Public-facing or mission-critical decisions
- Al Systems that performs or influences automated decision-making
- Any AI Systems that may introduce legal, ethical, or security risks

### **Employee Oversight**

- Al may assist, but employees retain full accountability
- All Al outputs must be validated by a human before use or distribution
- Higher-risk decisions require supervisor approval
- Al cannot independently:
  - Issue official statements
  - Make personnel decisions
  - Make legal/compliance determinations

Category Approved Practices (Allowed)

PII & Nonpublic Data

Use ONLY in ITS-approved AI systems with

proper safeguards

Model Training & Use

Ensure Al tools do not train on state data

unless explicitly authorized

Storage & Security

Use encrypted, access-controlled, ITS-

approved storage

Pata Classification Follow ITS data categories: Public /

Restricted / Confidential

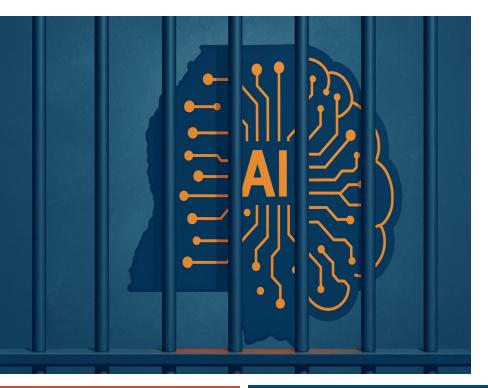

Al System Configuration Configure Al to prevent unauthorized

ingestion or export of state data

### **Prohibited Uses**

- Create deepfakes, impersonations, or misleading content
- Generate misinformation or conduct deceptive/harmful activity
- Replace human judgment in legally or ethically sensitive areas
- Process or store data on infrastructure owned by foreign adversaries
- Assume Al-generated content is correct without verification

### Statewide Al Training & Workforce Development

- Al training rollout is coming.
- Initial training for all staff; advanced sessions for key roles.
- Supports long-term workforce upskilling statewide.
- Agencies should identify AI champions and prioritize participation in advance trainings.
- ITS Website will house a live library of training resources

### **Next Steps**

- Review the Acceptable Use Policy, and make the policy your own
- Engage the Al Innovation Hub for Al use case development.
- Prepare your teams with Al training.
- Work with ITS to assess and develop AI initiatives.

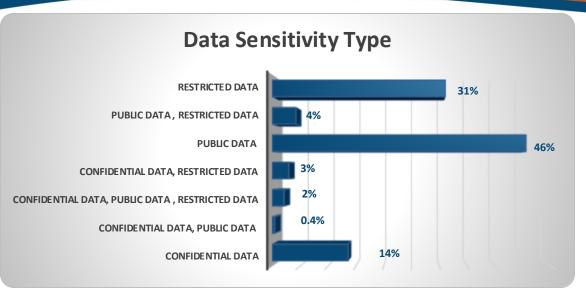

### Al Inventory Key Findings

- 98 state agencies responded to statewide Al inventory.
- 84% of agencies lack formal AI policies or procedures.
- 51% of agencies reported active AI usage.
- 243 total Al projects across 44 agencies.
- 69% of AI use cases include human-in-the-loop decision making.
- Microsoft and OpenAI are the leading solution providers.

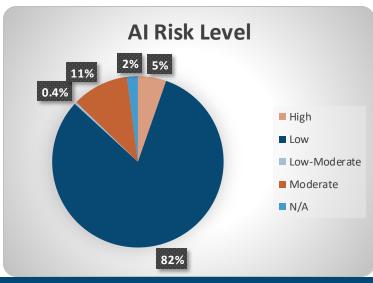

#### Common data types:

- Public 107 projects (46%),
- Restricted 73 projects (30%)
- Confidential 45 projects (14%)

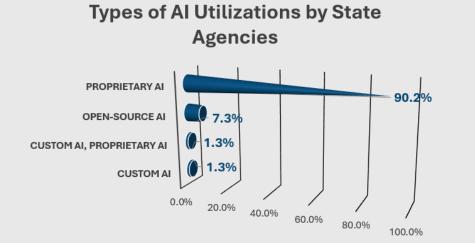

- 198 projects (82%) fall into the low-risk category;
- 26 (11%) are classified as moderate-risk
- 13 projects (5%) are listed as high-risk.

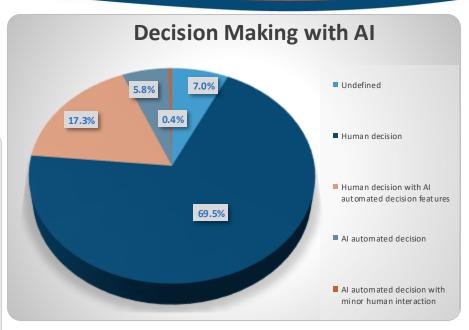

- Proprietary AI solutions represent 90.2% of all reported projects.
- Open-source AI solutions account for 7.2%
- Custom Al solutions for only 1.3%.

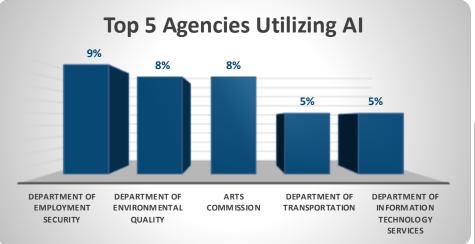

69.5% of AI projects rely on full human decision-making.

• 35% of all AI utilization among agencies is concentrated among five agencies.

 Microsoft, OpenAI, and Adobe solutions represent approximately 67% of all AI adoptions across the State.
