# Memorandum

**To**:    ITS Customers Requesting the E-911 PSAP Express Products List 3748

**From**:  Craig P. Orgeron, Ph.D.

**Date**:  August 1, 2014 *(Updated December 7, 2015)*

**Re**:    Instructions for Use for E-911 PSAP Express Products List 3748 August 2014 - May 2017

## 1.    Introduction

### 1.1    Scope

The E-911 Public Safety Answering Point (PSAP) Express Products List is to be used in the acquisition of specific categories of PSAP equipment and related services.

### 1.2    Who May Use

This EPL may be used by Mississippi agencies, universities, community/junior colleges and governing authorities (cities, counties, school districts, etc.).  ITS EPLs are multi-vendor awards that meet Mississippi requirements for legal purchases.

### 1.3    Dollar Limitations of Use

The maximum dollar limitation of this EPL for all users is **$500,000 per project.**  Projects costing in excess of $500,000 are beyond the scope of this delegated process and subject to full ITS review and authorization.  This list is governed under Procurement Instruments: Express Products Lists (EPLs) in the ITS Procurement Handbook.  The EPL is not to be confused with state contracts issued by Department of Finance and Administration, Office of Purchasing and Travel (DFA-OPT).

### 1.4    E-911PSAP EPL 3748 Effective Dates

E-911 PSAP EPL 3748 has a three-year contract:  June 2014 – May 2017.

2. **Using the E-911 PSAP Equipment EPL**

2.1     There are seven sellers on the list.  Please call these sellers with questions regarding pricing or products on this list using the *Vendor Information Chapter*.  Only the products included on the attached list are authorized by ITS for purchase.

2.2     There is one Manufacturer Reseller Group.  This model allows manufacturers to provide the not-to-exceed pricing and model numbers on behalf of their resellers.  For the most part, the Manufacturer Reseller Groups should be transparent to our customers.  Please call the Procurement Help Desk at 601-432-8166 if you have any questions.

2.2.1     If a product item shows "XXXXX Reseller Group," go to the *Vendor Information Chapter* for a listing of the resellers you may contact.  Use the steps outlined below in working with the vendors on that list for each step in the EPL procurement methodology, from negotiating updated pricing to placing your order.

2.2.2     Follow the directions in the *Vendor Information Chapter* regarding placement of order or remittance of payment.

2.2.3     **It is <u>extremely</u> important that you check with individual resellers within the Reseller Group for discounted pricing. Remember, the manufacturer proposed a "not-to-exceed" price and many of the resellers may offer you discounts from that price.**

2.3     Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists.   Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors.   These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment.   ITS excludes the authorization to purchase such  software and hardware from the E-911 EPL 3748 vendors if said items are not intended for use as part of the PSAP system.

2.4     Pricing on the E-911 PSAP Equipment EPL is not-to-exceed, meaning sellers may offer lower pricing at the time of sale.  Please notify ITS if an EPL vendor quotes a price higher than the EPL published price.

2.5     ITS encourages you to work with two or more sellers to support that you are choosing the products and services that meet your "lowest and best" criteria.

2.6     Customers may prepare their purchase orders using this list as their legal purchasing authority.

2.7     **Configuration Spreadsheets (one spreadsheet for each configuration)**

      2.7.1     **Configuration Header**
      At the top of each page of a system configuration you will find the Seller and/or Reseller Group name, the configuration number, and the name of the system.

      2.7.2     **Description of Standard Features**
      This section provides a brief description of the features included in the configuration.

      2.7.3     **Description of Installation Services**
      This section describes the installation features included when purchasing this configuration as a turnkey system. The section also includes a line item showing the dollar amount included in the turnkey cost for installation. The customer may choose to subtract this cost out of the base price, if installation is not desired.

      2.7.4     **Description of Training**
      This section includes a brief description of the training **included in the turnkey cost** of the system. The section also includes a line item showing the dollar amount included in the turnkey cost for training. The customer may choose to subtract this cost out of the base price, if training is not desired.

      2.7.5     **Description of Base Warranty**
      Description of the warranty **included in the turnkey price**. The minimum base warranty for all systems is described in the Technical Specifications section.

      2.7.6     **Enhanced Warranty and Post Warranty Options**
      Additional warranty options that may be purchased with the system.

2.8     **Components List (one per vendor)**
Each seller or manufacturer sponsoring a reseller group was given the opportunity to create a "Components List."   The seller or manufacturer sponsoring a reseller group used this section to propose any components that could be used with their systems. Sellers or manufacturers sponsoring a reseller group proposed components that are shown as line items in the base configuration as well as additional optional components that the customer may need to enhance their system.

2.9     **Product and Pricing Updates**

Updates to EPL are handled as follows:

      2.9.1     Optional Monthly Updates will be allowed. During the monthly update period existing awarded vendors may add, edit or delete products. Prices may be <u>lowered</u> at any update. Prices may only be <u>raised</u> in April and October.

2.9.2    Six Month Updates will be allowed in April and October of each year of the EPL. During the six-month update period ITS will accept proposal submissions for new vendors. Existing awarded vendors may add, edit or delete products. Prices may be <u>lowered</u> at any update. Prices may only be <u>raised</u> in April and October.

2.9.3    Updates to the EPL will be published as soon as practicable in the month following the deadline. EPL Customers will continue to use, and EPL Vendors must honor, the previous costs until the update is ready and published on the **ITS** Website.

## 3.    <u>What to do if the E-911 Equipment or Vendor you need is not on this List</u>

3.1    **Non-EPL Items**
Items ordered in conjunction with your EPL purchase that are not shown as line items on the EPL and are not part of a substitution within the EPL guidelines must be purchased using alternative procurement methods. For example, if a non-EPL approved phone set is ordered with your system, or you added a rack option not offered as an EPL line item, you may not use the EPL as your authority during an audit. Your authority for purchase would need to be based on other public purchasing mechanisms, with accompanying documentation for your audit trail. We suggest non-EPL items ordered on the same purchase order as EPL items be clearly labeled as Non-EPL Items.

3.2    **Substitutions**
If an E-911 PSAP Equipment EPL offering is replaced through a manufacturer's technology upgrade or new release, then the Seller may substitute the latest release of the product provided the customer is formally notified in writing of all details, the product is the technical equivalent, and the purchase price of the replacement product does not exceed the published EPL price of the item being replaced.

3.3    Should you need a more customized, specialized configuration or a service not on the attached list, please contact the **ITS Procurement Help Desk at (601) 432-8166.**

3.4    **Services**
Installation and training are included in the turnkey systems proposed. Should you need additional installation or training services, each seller optionally proposed hourly service rates as shown in the *Vendor Information Chapter*. <u>The rates for services published with this list may only be used in conjunction with equipment purchased from this list</u>.

## 4.    <u>Seller as a Prime Contractor and Use of Sub-Contractors</u>

4.1    RFP 3748 required that the seller must furnish all products and services as a prime contractor. All transactions and payment(s) are conducted directly with the approved EPL seller.

4.2 The seller must be able to provide installation and maintenance coverage. Sellers must provide free on-site configuration proposals using the accepted EPL products and services.

4.3 The proposing seller may use a subcontractor for the fulfillment of the services under RFP 3748. However, the use of subcontractors must be transparent to the customer with the proposing vendor responsible as the primary point of contact under the contract and to seamlessly coordinate the use of any subcontractor in providing the E-911 products and services.

5. **Contracts**

5.1 Each participating EPL seller has signed a *Master Purchase and Maintenance Agreement* with ITS.

5.2 The purchase order from any individual customer will serve as a supplement to these Agreements. Additional terms and conditions may be negotiated between the customer and vendor at the time of sale, as needed, as a supplement to the Master Agreement.

5.3 ITS recommends that the customer obtain a copy for their files of the *Master Purchase and Maintenance Agreement* for any particular seller being considered. You may request a copy of the contract from your vendor or by contacting ITS in writing as follows: Anthony Hardaway, 3771 Eastwood Drive Jackson, MS 39211 or by FAX at (601) 713-6380 or e-mail to anthony.hardaway@its.ms.gov.

6. **Specifications, Maintenance, and Response Times**

6.1 It is very important that the customer understand the specifications and maintenance requirements under this RFP. These are described in the Technical Specifications section of this EPL.

6.2 Shipping costs are included as part of the product purchase price.

6.3 Lightning damage coverage is included with each turnkey system as part of the purchase price and is also included in the post-warranty maintenance.

6.4 Response times during both the initial one-year on-site warranty as well as the post warranty on-site maintenance are the same:

6.4.1 Vendors for warranty and maintenance must have response centers available 24 X 7 X 365.

6.4.2 Vendor must provide a 1-hour response via telephone, remote access, or on-site to PSAP location.

6.4.3 Vendor must provide a 3-hour on-site response from initial contact if the problem cannot be resolved by telephone or remote access.

6.4.4 Replacement parts must carry the same warranty whether refurbished or new.

7. **How to Place Your Order**

7.1 Please contact the seller with questions regarding pricing or products on this list. Contact information is provided in the *Vendor Information Chapter* as outlined in the table of contents.

7.2 Please include the following information on all purchase orders.

7.2.1 E-911 PSAP Equipment EPL 3748. This will identify your purchase for audit purposes.

7.2.2 Bill to Address

7.2.3 Ship to Address

7.2.4 Purchase Order Number

7.2.5 Clear Description and Part Number

7.2.6 Contact Name and Phone Number for your Agency/Institution Purchasing Agent

8. **NIGP Codes for MAGIC**

State agency customers will be required to use NIGP codes when purchasing through Mississippi's Accountability System for Government Information and Collaboration (MAGIC). The following NIGP codes will be used for products purchased using the E-911 PSAP Equipment EPL.

| NIGP Code: | Use For: |
|---|---|
| 83845 | Telecommunication Equip., Emergency Radio/Telephone Systems |
| 83885 | Telecommunication Equip., Telecom Parts and Accessories |

## TABLE OF CONTENTS

**SECTION IX**
**TECHNICAL SPECIFICATIONS**

1.    **How to Respond to this Section**

   1.1    Beginning with Item 2.1 of this section, label and respond to each outline point in this section as it is labeled in the RFP.

   1.2    The Vendor must respond with "ACKNOWLEDGED," "WILL COMPLY" or "AGREED" to each point in this section.  In addition, many items in this RFP require detailed and specific responses to provide the requested information. Failure to provide the information requested will result in the Vendor receiving a lower score for that item, or, at the State's sole discretion, being subject to disqualification.

   1.3    "ACKNOWLEDGED" should be used when no vendor response or vendor compliance is required.  "ACKNOWLEDGED" simply means the vendor is confirming to the State that he read the statement.  This is commonly used in the RFP sections where the agency's current operating environment is described or where general information is being given about the project.

   1.4    "WILL COMPLY" or "AGREED" are used interchangeably to indicate that the vendor will adhere to the requirement.  These terms are used to respond to statements that specify that a vendor or vendor's proposed solution must comply with a specific item or must perform a certain task.

   1.5    If the Vendor cannot respond with "ACKNOWLEDGED," "WILL COMPLY," or "AGREED," then the Vendor must respond with "EXCEPTION."  (See Section V for additional instructions regarding Vendor exceptions.)

   1.6    Where an outline point asks a question or requests information, the Vendor must respond with the specific answer or information requested.

   1.7    In addition to the above, Vendor must provide explicit details as to the manner and degree to which the proposal meets or exceeds each specification.

2.    **General Overview:  Two Types of Proposed Solutions**

   2.1    Turnkey Solutions.  It is the State's preference that the E-911 PSAP EPL primarily consist of Value-added Vendors that can provide a complete PSAP turnkey solution for our E-911 Centers.

        2.1.1    Vendors that propose a turnkey configuration on this EPL shall be responsible for providing a complete Enhanced-911 (E-911) system Automatic Number Identification (ANI) and Automatic Location Identification (ALI) along with the other functions specified in this RFP.  Vendor's responsibility shall include all

equipment, installation, maintenance, and training needed to provide a complete and fully operational E-911system.

2.1.2    Sellers will propose the turnkey solutions in a "Base Systems Configuration Spreadsheet" provided with this RFP.

2.2    Components List.  **ITS** will additionally allow sellers to propose a list of components or options that to be used in PSAP centers in a spreadsheet provided with this RFP.

2.2.1    Sellers that have proposed a Turnkey Solution are required to also submit the Component List.  This is so that customers may order additional products for the turnkey solution or, in some cases, to have a price structure for subtracting an un-needed product from the turnkey configuration.

2.2.2    **ITS** will allow sellers to only propose the Component List if they cannot support an entire PSAP solution.  An example might be a seller specializing only in voice recorders or logging printers.

3.    **Turnkey Solutions:  EPL Base System Configurations**

3.1    Basic Information

3.1.1    Vendor may propose up to eight PSAP systems using the Base System Configuration Spreadsheets.

3.1.2    All systems proposed must be turnkey and include all hardware and software components, installation, maintenance and training.

3.1.3    Vendors should focus on two and four position systems.  At a minimum, all turnkey vendors must propose at least one two position system.

3.1.4    Please be reminded that this RFP is intended for basic E-911 systems and large and expensive systems may be the subject of a specialized RFP and are out of scope of RFP 3748.

3.1.5    Turnkey configurations that are deemed by **ITS** to be outside the scope of this RFP will not be published.

3.1.6    Vendors must fully describe the open configurations in Section XII: *Cost Information Submission*.

3.2    Two and Four Position Consoles

3.2.1    Vendor may propose and describe in Section XII: *Cost Information Submission*, Base System Configuration Spreadsheets, the equipment, installation, maintenance and training needed for a basic 2 and 4-position PSAP centers.  The systems must be turnkey with all functionality needed for a basic PSAP.  Required

base minimum specifications and features for all proposed systems are described below.

3.2.2　　In Section XII: *Cost Information Submission*, Vendor should sufficiently describe all equipment in the base turnkey system. This should include, at a minimum, the functionality and description of the system, its console, its telephones/headsets, display monitors, basic display features for phone and console, and the core system components/card shelf.

3.2.2.1　　Vendor must describe trunk line capability.

3.2.2.2　　Vendor must state maximum number of trunks per system.

3.2.3　　An Administrative Position/lines may be optionally proposed in the Components List Spreadsheet. Alternatively, Vendor may propose systems that include an administrative position as one of their eight Configuration slots.

3.2.4　　Excluded items. The following items should not be included in the "Base Systems Configuration Spreadsheets". Vendors **may** propose these items in the "Component List Spreadsheet" section.

3.2.4.1　　Furniture specific to a PSAP installation.

3.2.4.2　　Logging Recorders. Note that Vendors may propose a variety of sizes or manufacturers in the Component List.

3.2.4.3　　CAD systems. Basic CAD systems to support the E-911 system may be proposed in the Component List. However, please be reminded that large and expensive CAD systems are beyond the scope of basic E-911 configurations and this RFP.

3.2.4.4　　GIS Interface. Basic GIS systems to support the E-911 system may be proposed in the Component List. However, please be reminded that large and expensive GIS systems are beyond the scope of basic E-911 configurations and this RFP.

3.2.4.5　　Call-out notification systems are excluded from the RFP in their entirety. They are outside the scope of a basic E-911 system.

3.2.5　　Voice over Internet Protocol (VoIP)

3.2.5.1　　VoIP systems are **not** excluded from RFP 3748

RFP 3748
E-911 PSAP EPL
June 1, 2014 – May 31, 2017

Information Technology Services

Last Updated:
August 1, 2014

3.2.5.2 Vendor must clearly identify all VoIP systems or all VoIP components in their descriptions in Section XII: *Cost Information Submission*.

3.2.5.3 VoIP systems must meet all technical specifications required in RFP 3748.

4. **Components List Spreadsheet**

4.1 The primary purpose of the Component List if to provide turnkey Vendors with the ability to add or subtract products or propose additional varieties of products for their turnkey solutions, based upon the Customer needs. Therefore, Vendors proposing turnkey configurations are required to also submit the associated Component List Spreadsheet and will have additional choices in the types of products they may submit.

4.2 Turnkey Configuration Vendors may propose any additional components that can be used with the base configurations proposed. The Component List format is described in Section XII: *Cost Information Submission*.

4.2.1 Examples include alternatives such as display sizes and types, console options, additional telephone sets, etc.

4.2.2 Vendor is limited to 500 lines items in the Component List.

4.2.3 Vendor should propose additional SKU's for extended warranties if offered by the Manufacturer.

4.2.4 Seller must propose hourly labor rates in the Vendor Fees table described in Section X.

4.2.5 Vendor may propose additional training flat fees or customized rates.

4.3 **ITS** will allow non-Turnkey Vendors to only propose the Component List if they cannot support an entire PSAP solution. An example might be a seller specializing only in voice recorders or logging printers.

4.3.1 Excluded from the Component List for those Vendors that are NOT offering a turnkey solution are:

4.3.1.1 Furniture

4.3.1.2 Software

4.3.1.3 Technology that is not specific to a PSAP installation that is available on other **ITS** Express Products List, including displays, switches, racks, servers, basic office printers, UPS. Customers should go to those EPLs for such items.

4.3.1.4   Note that Vendors that ARE proposing entire PSAP turnkey solutions may include these items in their turnkey configurations as well as their component spreadsheets to give their customers additional choices.

## 5.   Base Minimum Specifications for all Configurations

5.1   All proposed equipment must be new.

5.2   All equipment must meet the most current industry standards.

5.2.1   Must comply with NENA-04-001 Standards for PSAP Equipment.

5.2.2   Must be UL approved.

5.2.3   Must comply with applicable FCC Regulations.

5.2.4   Must comply with Phase I and Phase II of FCC Docket 94-102.

5.3   The system must provide redundancy so that a failure of a single component will not cause a failure of the complete system. A single ALI controller will be allowed provided that basic ANI information is still received if the ALI controller fails.

5.4   The Vendor must provide an Uninterruptible Power Supply (UPS) capable of maintaining the system for a minimum of fifteen (15) minutes in the event of a commercial power failure.

5.5   Logging Printer

5.5.1   All configurations must be proposed with a logger printer that, at a minimum, records the following information:

5.5.1.1   ANI Phone Number

5.5.1.2   Time that Call was Received

5.5.1.3   Amount of Time between call seizure and call answer

5.5.1.4   Identity of Call-Taker Position

5.5.1.5   Time and Call-Taker Position of Disconnect

5.5.2   The system should be capable of customizing the logging printer output according to the customer's needs.

5.6   System must be capable of interfacing with a radio/dispatch workstation.

5.7   All equipment must be compatible with the servicing phone company's network. Vendor must describe how proposed equipment handles the following:

    5.7.1       Selective Routing

    5.7.2       Automatic Number Identification (ANI)

    5.7.3       Automatic Location Identification (ALI)

    5.7.4       Forced Disconnect

5.8       The system must interface with the servicing phone company's ALI database.

5.9       The system display must provide, at a minimum, the following information:

    5.9.1       Time and Date of Call

    5.9.2       ANI Number

    5.9.3       Name of Subscriber

    5.9.4       Physical Location of the Telephone (ALI Information)

    5.9.5       Emergency Service Number (ESN)

    5.9.6       Primary Responding Agencies for the Caller Location

5.10      System must be capable of requesting an ALI retransmit from any Call-Taker position.

5.11      System must be capable of re-dialing a dropped call based on ANI information.

5.12      Calls placed on hold must be available to any Call-Taker position.

5.13      Redundant system components must be "hot swappable" including interface cards, telephone sets, displays, etc.  Swapping of these components must not interfere with the operation of the non-affected component.

5.14      System must have audio fail-over capability.  The system must pass through audio in the event of a CPU failure.

5.15      The system must be capable of providing distinctive ring based on call-type.

5.16      The system must be able to display TDD calls based on current ADA standards.

5.17      The above specifications for the system also apply to the individual components if proposed in the Component List.

## 6.    Delivery, Installation, and Acceptance Requirements

6.1      Vendor is responsible for all costs associated with shipping.

6.2     Vendors must conduct a site visit at no charge and provide the customer in writing minimum site requirements for each installation including but not limited to:  Network Interface, power requirements, floor space, backboards, environmental control, etc.

6.3     Vendor is responsible for ensuring that Vendor's PSAP equipment is compatible with customer's E-911 Service Provider Network.

6.4     Vendor must offer installation for all products proposed.  For systems proposed as "Base System Configurations," the cost of the installation must be included as part of the turnkey price.  If the Vendor is willing for the customer to self-install the system, the Vendor may optionally provide the break-out cost of installation for the customer to subtract from the turnkey cost.  For products proposed as part of the "Components List," Vendor must provide installation cost in the form of hourly labor rates or if applicable, flat installation rates for listed components.

6.5     Selected Vendor will prepare an installation schedule of work to be done including milestone dates and estimated completion date.

6.6     All installation will be done by qualified personnel and properly installed and integrated for acceptance testing within the scheduling deadline.   All installation must be in accordance will all industry, state and federal standards.  Installation must include all cabling, connections to trunks and circuits, and testing to result in a one hundred percent functioning public safety answering point position.  Vendor must specify the responsibility for electrical and other environment requirements as part of the site requirement's document.

6.7     It is understood by the Vendor that Customer will not sign the acceptance document until the following conditions have been met:

6.7.1     The network and equipment has operated for fourteen (14) consecutive days of operation with no problems.

6.7.2     The quality and level of transmission is consistent with the published specifications for the system.

6.7.3     The agreed upon training program for system administrators and station user personnel has been satisfactorily completed.

6.7.4     The system documentation including user and system manuals is complete and on file at the Customer's premises.

7.     **Warranty and Maintenance**

7.1     All systems and components must carry a minimum one-year on-site warranty.

7.2     Post Warranty for purchased systems.

      7.2.1     Vendor must propose on-site maintenance pricing for years two through five.

7.3     Warranty and Maintenance service carry the same requirements:

      7.3.1     Vendors for warranty and maintenance must have response centers available 24 X 7 X 365.

      7.3.2     Vendor must provide a 1-hour response via telephone, remote access, or on-site to PSAP location.

      7.3.3     Vendor must provide a 3-hour on-site response from initial contact if the problem cannot be resolved by telephone or remote access.

      7.3.4     Replacement parts must carry the same warranty whether refurbished or new.

7.4     Vendor should be able to provide maintenance and parts for no less than 7 years after final acceptance of the system.

7.5     System must be capable of notifying an administrator in the event of a system fault. The system should have fault notification levels that are user selectable.

## 8. **Training**

8.1     Vendor must detail training that will be provided to customer as part of the base turnkey configuration.

8.2     A minimum of two days (16 hours) of training at customer location for a minimum of three persons for each call-taker position proposed must be included and completed prior to cut over to the new system.

8.3     Vendor must detail what additional training opportunities Vendor provides, both directly with Vendor's personnel or as a pass-through for manufacture's offered training or classes. Include whether training is on customer site, Vendor's center, or third party off-site location.

## 9. **Additional Requirements**

**ITS** acknowledges that the specifications within this RFP are not exhaustive. Rather, they reflect the known requirements that must be met to support our Microsoft Agreements. Vendor must specify here, what additional services may be needed and are proposed in order to support these agreements.

|---|---|---|
| **Configuration # 1** | **Type and Number of Positions:** | |
| **Manufacturer and System Name: INTRADO V-VIPER** | **V-Viper - 2 position 2 trunks** | |

| Description of Standard Features |
|---|
| **This section describes the features included when purchasing this configuration as a turnkey system.** |
| Positron V-VIPER is designed to deliver the VIPER experience to PSAPs with 5 positions or less. V-VIPER features the same industry leading performance and Next Generation 9-1-1 functionality at a price tailored for small agencies. V-VIPER packages the VIPER and Power 911 feature set into a compact hardware footprint. This greatly reduced equipment infrastructure is i3 compliant and accepts texts and ESInet 9-1-1 connectivity today. As PSAPs migrate to a full i3 architecture, V-VIPER will support all standards-based interfaces, offering complete peace of mind. |

| **Configuration # 4** | **911 system - 2 Positions - 2 Trunks - CTI** | |
| **Manufacturer and System Name: CASSIDIAN** | **VESTA 4X** | |

| Description of Standard Features |
|---|
| **This section describes the features included when purchasing this configuration as a turnkey system.** |
| The Vesta 4 is a robust, standards-based IP software solution engineered to accommodate the physical and functional specifications of today's emergency call centers. It offers a full suite of computer telephony (CTI) features and supports automatic number identification/automatic location identification (ANI/ALI) capabilities. Key Features: Can support up to 100 call taking positions and up to 150 trunks and lines; has an IP-centric architecture that supports evolving critical communications standards. |

| Description of Standard Features | | |
|---|---|---|
| **This section describes the features included when purchasing this configuration as a turnkey system.** | | |

xSwitch™ is an Internet Protocol (IP)-based, i3-aligned software-based switch that is a proven Next Generation 9-1-1 switch for routing ALL TYPES of emergency calls within your PSAP to the call taker; Aligns with emerging NG9-1-1 and i3 standards; Maintains connectivity with the caller and will automatically, within seconds, redeliver the call to an alternate position or even a SIP phone; Runs on Common Off The Shelf (COTS) equipment - a cost-effective alternative to proprietary, hardware-based
CPE

Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.

PURCHASES MADE FROM THIS LIST MAY NOT EXCEED $500,000 PER PROJECT.

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or  other possible software licenses covered by other ITS Express Products Lists.  Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors.  These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment.   ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**

| COMPANY NAME | Emergency CallWorks, Inc. | |
|---|---|---|
| **Configuration # 1** | **911 System C/O: Two (2) Positions, Eight (8) Trunks, Eight (8) Admin Lines, With Mapped ALI** | |
| Manufacturer and System Name: | Emergency CallWorks, Inc. CallStation (Includes Mapping) | |

| Description of Standard Features | | |
|---|---|---|
| This section describes the features included when purchasing this configuration as a turnkey system. | | |

CallStation® is an economical and proven VoIP based 9-1-1 platform with a legacy CAMA interface, Next Generation 9-1-1 compliance and a messaging platform with consolidated Emergency and Administrative call taking served by NENA compliant standard telephony. External VoIP sets from Polycom are provided along with a traditional CAD spill for integration into other 3rd party products like CAD, Long Term Recorders and Mapped ALI if desired. Full MIS and Data Mining capabilities are included. Headset and Long Term recorder interfaces are provided as needed. Browser based Mapped ALI is included at no additional charge. All hardware, Software, Services, Support and Remote Monitoring is provided along with Dual 22" LCD displays at each position. DispatchStation (CAD) can be added to those sites that need or may be considering an upgrade to CAD for a totally integrated solution. See DispatchStation in other Configurations.

| **Configuration # 5** | **911/Dispatch System C/O: Four (4) Positions, Eight (8) Trunks, Eight (8) Admin Lines, With Mapped ALI and Integrated Computer Aided Dispatch** | |
| **Manufacturer and System Name:** | **Emergency CallWorks, Inc. DispatchStation (Includes 911, Mapping and CAD)** | |

| Description of Standard Features |
|---|
| This section describes the features included when purchasing this configuration as a turnkey system. |

DispatchStation® is a one of a kind, economical and proven VoIP based 9-1-1 platform with market leading 911, Mapping and CAD integration in one package. Legacy CAMA interface, Next Generation 9-1-1 compliance and a messaging platform with consolidated Emergency and Administrative call taking and dispatching capability served by NENA compliant standard telephony. External VoIP sets from Polycom are provided along with a traditional integration into other 3rd party products like Long Term Recorders and Fire Records as desired. Full MIS and Data Mining capabilities are included. Headset and Long Term recorder interfaces are provided as needed. Browser based Mapped ALI is included at no additional charge. All hardware, Software, Services, Support and Remote Monitoring is provided along with Dual 22" LCD displays at each position.

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**

PURCHASES MADE FROM THIS LIST MAY NOT EXCEED $500,000 PER PROJECT.

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**

**Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.**
